London EC2M 7LH (GB)

(72) Inventors:
• **Hayward, Ken**
Brockport, New York 14420 (US)

(54) Method and apparatus for supporting a user

(57) A method of providing support to a user of a computer peripheral includes sensing a peripheral indicia at a computer and registering the peripheral and downloading from a server additional information about the peripheral based on the peripheral indicia. The peripheral indicia includes any of a model number, a part number, a serial number, a date of manufacturer and a configuration indicia. Registering the peripheral is per-

formed by launching a communications browser to connect to the server. The method also senses a peripheral condition at the computer where the peripheral condition includes either an error code or a code indicative of a consumable reaching a predetermined threshold or both. This method accesses the server at an address defined by the peripheral condition, and the server provides the browser with additional information about the peripheral condition.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 30 7970

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
